

How to Apply a LUT in Final Cut Pro

A seven-step walkthrough for loading your FOCL Media LUTs and dialling in a clean, cinematic grade.

- 1 Select the clip (or adjustment layer) you want to colour grade.
 - 2 Open the **Effects Browser** (bottom right of the screen) and search for **Custom LUT**.
 - 3 Drag and drop **Custom LUT** onto your selected clip or adjustment layer.
 - 4 Open the **Inspector** (top right), then under **Custom LUT** click **Choose Custom LUT**.
 - 5 Locate your downloaded LUT folder and import it.
 - 6 Your LUTs will now appear in the **Custom LUT** dropdown menu. Select the LUT you'd like to use.
 - 7 Make your final **exposure**, **contrast** and **white balance** adjustments to fine-tune the image.
-

Watch the full walkthrough

For a complete walkthrough showing exactly how we apply and fine-tune our LUTs, watch the tutorial below.

It covers how to properly adjust exposure, white balance and contrast to get the best possible result from each LUT.
